

READING TEXT

People have different opinions about who is responsible for a person's lifestyle and well-being. Some believe that individuals should make their own healthy choices and take control of their habits. Others argue that family, society, money, and social media strongly influence people's decisions. The article explores different perspectives on responsibility, well-being, and the factors that shape human behavior and identity.

The Case for Personal Responsibility

Many health professionals and philosophers argue that personal responsibility lies at the heart of a well-lived life. From this perspective, every individual possesses the agency – the capacity to choose and act, and it is through the exercise of this agency that identity is formed. Choosing to exercise, to eat nutritiously, to sleep well, and to manage stress are not simply habits; they are expressions of who we are and what we value. Psychologists refer to this as having an “internal locus of control” – a belief that one's own actions, rather than external forces, determine outcomes.

Research often supports the benefits of taking personal ownership. A landmark study published in the Journal of Health Psychology found that individuals who scored highly on self-efficacy measures – that is, those who believed in their ability to make positive changes – were significantly more likely to maintain healthy behaviors over time, regardless of their socioeconomic background.

Furthermore, advocates of personal responsibility argue that framing health as someone else's problem can be disempowering. When individuals attribute their choices entirely to outside forces, they risk becoming passive. Taking ownership, by contrast, builds confidence, resilience, and a sense of purpose, qualities that are central to a positive identity.

Social and Environmental Influences

However, the idea that individuals are entirely responsible for their own health is increasingly challenged by social scientists and public health experts. Research in sociology demonstrates that where we grow up, how much money our family has, and the cultural rules we are raised with profoundly shape the choices available to us.

A teenager growing up in a neighborhood with no safe parks or affordable sports facilities cannot simply "choose" to exercise easily. A family with limited income may struggle to prioritize fresh vegetables over cheaper processed foods. These are not failures of willpower; they are structural barriers, obstacles built into the environment that restrict genuine choice.

Moreover, advertising and social media exert enormous pressure on young people. Brands invest billions in campaigns designed to shape preferences and habits, often targeting teenagers who are at a particularly impressionable stage of development.

Words to know

challenge v	يتحدى / يشكك في	social scientist	عالم اجتماع
public health expert	خبير الصحة العامة	sociology n	علم الاجتماع
demonstrate v	يثبت / يوضح	grow up	ينشأ / يكبر
profoundly adv	بعمق / بشكل جذري	neighborhood n	حي / منطقة سكنية
affordable adj	ميسور التكلفة	sports facilities	مرافق رياضية
limited income	دخل محدود	struggle to	يكافح من أجل
prioritize v	يعطي الأولوية لـ	processed foods	الأطعمة المصنعة

willpower n	قوة الإرادة	structural barriers	عوائق بنيوية / حواجز هيكلية
obstacle n	عائق	restrict v	يقيّد
genuine choice	اختيار حقيقي	moreover adv	علاوة على ذلك
exert v	يمارس (ضغطًا)	enormous pressure	ضغط هائل
brand n	علامة تجارية	invest v	يستثمر
campaign n	حملة	target v	يستهدف
impressionable adj	سريع التأثير	stage of development	مرحلة من مراحل النمو

The Role of Government and Shared Responsibility

A third perspective argues that responsibility is not an either-or choice; it does not belong entirely to the individual or entirely to society, but is shared. Governments, schools, families, and communities all have a role in creating the conditions that make healthy living possible and accessible.

In recent decades, many governments have introduced public health policies intended to guide and encourage better choices: taxes on high-sugar drinks, restrictions on junk food advertising near schools, and national campaigns promoting physical activity. Proponents argue that these measures do not remove individual freedom – they reshape the environment so that the healthier choice becomes the easier choice.

Economist Richard Thaler's concept of the “nudge” captures this idea precisely: small, well-designed changes to the context in which decisions are made can shift behavior without restricting freedom. From this viewpoint, responsibility is not abandoned by the individual — it is supported and shared by the structures around them.

Words to know

either-or choice	خيار بين هذا أو ذاك	belong entirely to	ينتمي بالكامل إلى
community n	مجتمع محلي	create the conditions	يهيئ الظروف
accessible adj	متاح / سهل الوصول	recent decades	العقود الأخيرة
public health policy	سياسة صحية عامة	intend to	يهدف إلى
high-sugar drinks	مشروبات عالية السكر	restriction n	قيّد / تقييد
junk food advertising	الإعلان عن الوجبات السريعة	national campaign	حملة وطنية
promote v	يرجّز / يعزز	proponent n	مؤيد
measure n	مقياس / إجراء	individual freedom	الحرية الفردية
reshape v	يعيد تشكيل	economist n	خبير اقتصادي
concept n	مفهوم	nudge n	دفعّة لطيفة / توجيه غير مباشر
capture v	يجسد / يعبر عن	precisely adv	بدقة
context n	سياق	shift behavior	يغيّر السلوك
viewpoint n	وجهة نظر	abandon v	يتخلّى عن
structure n	بنية / هيكل		

Vocabulary Study · Definitions

agency n قدرة على الاختيار والتصرف	the power to make choices and take independent action.
disempowering adj مضعف للقدرة - مفقد للسيطرة	making someone feel less capable or in control.
locus of control n موضع التحكم - مركز التحكم	a person's belief about whether they control their own life.
nudge n دفعة لطيفة - توجيه غير مباشر	a gentle push toward a certain behaviour without force.
resilience n مرونة - قدرة على التعافي	the ability to recover and adapt in the face of difficulty.
self-efficacy n الكفاءة الذاتية	the belief in one's own capacity to succeed.
structural barriers n عوائق بنيوية - حواجز هيكلية	an obstacle in the environment that limits genuine choice.

Key Vocabulary

agency n قدرة على الاختيار والتصرف	disempowering adj مضعف للقدرة - مفقد للسيطرة

Lesson 3
Whose Responsibility Is It?

I Choose the correct answer from a, b, c or d:

- 1** Hassan made his own decisions without help; this shows real
A agency **B** confidence **C** preference **D** restriction
- 2** The comment made Lyan feel weak and helpless; it was
A encouraging **B** disempowering **C** genuine **D** external
- 3** Hassan looks at his own mistakes, rather than blaming others; this shows his
A peer pressure **B** self-efficacy
C locus of control **D** structural barrier
- 4** Placing fruits at the front encourages customers without forcing them; this is a
A restriction **B** penalty **C** campaign **D** nudge
- 5** Lyan got over her failure quickly and started again; she showed
A resilience **B** weakness **C** nudge **D** preference
- 6** Believing that you can succeed through your own effort and skills is called
A peer pressure **B** self-efficacy **C** willpower **D** locus of control
- 7** Lyan cannot visit the clinic because of its bad opening hours; this represents a
A personal excuse **B** preference
C structural barrier **D** peer pressure
- 8** It takes real to control yourself and cut out sugar completely.
A willpower **B** background **C** weakness **D** capacity
- 9** Teens are easily influenced by what they see because they are
A powerful **B** impressionable **C** affordable **D** genuine
- 10** Fresh vegetables must be cheap so that poor families can buy them; they should be
A internal **B** genuine **C** affordable **D** central
- 11** Hassan studies how society shapes human behavior and choices; he likes
A psychology **B** economics **C** philosophy **D** sociology
- 12** Taking full responsibility for your own choices means taking of your life.
A ownership **B** freedom **C** capacity **D** preference
- 13** More students passed the test; this was a positive
A restriction **B** outcome **C** policy **D** context
- 14** Teenagers often change their style because of pressure from their friends; this is
A public health **B** willpower **C** peer pressure **D** self-efficacy

- 15** The ministry created a new to stop bad eating habits in schools.
A journal **B** brand **C** facility **D** policy
- 16** The new sports center in our area is free for everyone; it is a great public
A facility **B** measure **C** force **D** context
- 17** With very little money, families must put food before luxury items; they food.
A attribute **B** prioritize **C** demonstrate **D** restrict
- 18** Social media can put heavy stress and force on young people; it can pressure.
A abandon **B** introduce **C** exert **D** receive
- 19** Growing up from a child to a teenager means you are an
A advocate **B** proponent **C** philosopher **D** adolescent
- 20** Children from different financial and social backgrounds are from different levels.
A socioeconomic **B** internal **C** genuine **D** central
- 21** Poor families often find it hard and to pay for extra school activities.
A demonstrate **B** struggle **C** determine **D** manage
- 22** "Students need agency to shape their own identity." The noun "agency" is closest in meaning to
A helplessness **B** dependence **C** power **D** weakness
- 23** "A harsh comment can be disempowering for a beginner." The antonym of "disempowering" is
A weakening **B** encouraging **C** limiting **D** discouraging
- 24** "Hassan has a strong internal locus of control." The phrase "locus of control" is closest in meaning to
A sense of control **B** loss of control
C lack of control **D** absence of choice
- 25** "The poster was only a nudge, not an order." The antonym of "nudge" is
A prompt **B** gentle push **C** force **D** encouragement
- 26** "The team showed great resilience after their defeat." The noun "resilience" is closest in meaning to
A fragility **B** weakness **C** adaptability **D** vulnerability
- 27** "High self-efficacy helps learners keep going." The antonym of "self-efficacy" is
A self-doubt **B** self-belief
C confidence **D** belief in ability
- 28** "Good schools give learners real agency." The antonym of "agency" is
A helplessness **B** power **C** capacity **D** control
- 29** "Constant criticism can be disempowering." The adjective "disempowering" is closest in meaning to
A empowering **B** encouraging **C** enabling **D** discouraging

- 30** "Expensive fees can be a structural barrier." The antonym of "structural barrier" is
- A** systemic obstacle **B** opportunity
C institutional barrier **D** built-in obstacle
- 31** "A friendly reminder can act as a nudge." The noun "nudge" is closest in meaning to
- A** force **B** gentle push **C** pressure **D** compulsion
- 32** "Her resilience impressed the whole committee." The antonym of "resilience" is
- A** toughness **B** adaptability
C ability to recover **D** fragility
- 33** "The training raised the students' self-efficacy." The noun "self-efficacy" is closest in meaning to
- A** self-doubt **B** insecurity **C** low confidence **D** self-belief
- 34** It would be unfair to attribute poor health personal laziness alone.
- A** for **B** on **C** to **D** of
- 35** You are responsible the decisions you make every day.
- A** to **B** of **C** with **D** for
- 36** Hassan believes the power of small daily changes.
- A** in **B** on **C** at **D** for
- 37** Every citizen belongs a community that helps to shape his choices.
- A** with **B** to **C** for **D** at
- 38** Children who grow near safe parks are far more likely to stay active.
- A** in **B** on **C** over **D** up
- 39** Many of the examples in the article relate everyday choices about food.
- A** to **B** on **C** with **D** over
- 40** When the club let members plan their own training, Hassan finally felt he had real agency. What does "agency" mean in this context?
- A** The duty to obey the decisions of a group without question **B** The feeling of being liked and accepted by other members
C The power to make choices and take independent action **D** The service an office provides for other people
- 41** Being told that nothing she did would change the result was disempowering for Lyan. What does "disempowering" mean in this context?
- A** Making someone work far harder than before **B** Giving someone a clear and detailed explanation
C Helping someone recover after a disappointment **D** Making someone feel less capable or in control

- 42** Hassan believes his results depend on his own effort, so he has an internal locus of control. What does "locus of control" mean in this context?
- A** A person's belief about whether they control their own life
 - B** A method that teachers use to keep order in a classroom
 - C** A rule that limits what students are allowed to do
 - D** A place where important public decisions are officially made
- 43** Putting water bottles at eye level and sweets on a lower shelf was a nudge, not a ban. What does "nudge" mean in this context?
- A** A strict rule that removes the unhealthy choice entirely
 - B** A gentle push toward a certain behavior without force
 - C** A financial penalty for making a poor choice
 - D** A public health warning printed on the packaging
- 44** Lyan lost a term through illness but caught up with the class by June, showing real resilience. What does "resilience" mean in this context?
- A** The natural talent that makes any training unnecessary
 - B** The refusal to admit that anything at all has gone wrong
 - C** The ability to recover and adapt in the face of difficulty
 - D** The strong wish to perform better than everyone else
- 45** Because he had solved similar problems before, Hassan began the task with strong self-efficacy. What does "self-efficacy" mean in this context?
- A** The general feeling of being a worthwhile person
 - B** The habit of asking others to check every step
 - C** The fear of starting any unfamiliar task alone
 - D** The belief in one's own capacity to succeed
- 46** With no bus running after six o'clock, the lack of evening transport was a structural barrier. What does "structural barrier" mean in this context?
- A** An obstacle in the environment that limits genuine choice
 - B** An excuse a person gives for avoiding difficult work
 - C** A temporary delay that is soon put right again
 - D** A rule that applies equally to everybody involved
- 47** Which situation best illustrates "agency"?
- A** A trainee follows every instruction exactly as his manager gives it.
 - B** A trainee suggests his own method for the task and then carries it out himself.
 - C** A trainee decides what he would prefer to do but waits for permission before starting.
 - D** A trainee telephones an agency to look for temporary work in the summer.
- 48** Which situation best illustrates a "nudge"?
- A** A library puts the returns box beside the exit, where borrowers pass it.
 - B** A library fines every reader who keeps a book past the return date.
 - C** A library refuses entry to anyone who still owes a charge.
 - D** A library offers a small cash reward to every reader who returns a book early.

49 Which situation best illustrates a "structural barrier"?

- A** A student decides that studying science is not interesting enough.
- B** A student misses two weeks of lessons because he is ill in hospital.
- C** A student cannot join the extra math class because his family cannot pay.
- D** A student prefers to spend his free afternoons with friends rather than studying.

50 Which situation best demonstrates "resilience"?

- A** A student fails a test and stops going to school.
- B** A student fails a test, studies harder, and passes the next one.
- C** A student fails a test and blames the hard questions.
- D** A student fails a test and ignores his total score.

2 Read the following text, then find the word or phrase in the text that could meaningfully replace the words below.

A good school gives every student some real power over the way they learn. A quiet prompt from a teacher often works better than a strict order. When results are poor, adaptability matters more than talent, because it helps learners begin again. Praise that is honest also builds self-belief, so students expect to succeed next time. Yet high fees remain an institutional barrier for many families. A careless remark can be deeply discouraging.

- 1 agency
- 2 nudge
- 3 resilience
- 4 self-efficacy
- 5 structural barrier
- 6 disempowering

3 Complete the sentences using the correct form of the word in brackets.

- 1 Giving students real (agent) means letting them decide and act for themselves.
- 2 Clear and honest feedback can (empowerment) a learner to try again.
- 3 The programme's main aim is the (empower) of young women in the village.
- 4 Small daily habits help people (controlled) their long-term health.
- 5 A carefully (control) diet helped him recover after the illness.
- 6 A short message from the app can (nudging) users toward a healthier choice.
- 7 Teenagers who face difficulties early often become more (resilience).
- 8 She reacted (resilient) to the criticism and carried on with her work.
- 9 Hassan's belief that he can pass the exam is called self-..... (effective).
- 10 The whole (structural) of the health system was reviewed last year.

 READING TEXT**The Case for Personal Responsibility**

Many health professionals and philosophers argue that personal responsibility lies at the heart of a well-lived life. From this perspective, every individual possesses the agency – the capacity to choose and act, and it is through the exercise of this agency that identity is formed. Choosing to exercise, to eat nutritiously, to sleep well, and to manage stress are not simply habits; they are expressions of who we are and what we value. Psychologists refer to this as having an “internal locus of control” – a belief that one's own actions, rather than external forces, determine outcomes.

Research often supports the benefits of taking personal ownership. A landmark study published in the *Journal of Health Psychology* found that individuals who scored highly on self-efficacy measures – that is, those who believed in their ability to make positive changes – were significantly more likely to maintain healthy behaviors over time, regardless of their socioeconomic background.

Furthermore, advocates of personal responsibility argue that framing health as someone else's problem can be disempowering. When individuals attribute their choices entirely to outside forces, they risk becoming passive. Taking ownership, by contrast, builds confidence, resilience, and a sense of purpose, qualities that are central to a positive identity.

Social and Environmental Influences

However, the idea that individuals are entirely responsible for their own health is increasingly challenged by social scientists and public health experts. Research in sociology demonstrates that where we grow up, how much money our family has, and the cultural rules we are raised with profoundly shape the choices available to us.

A teenager growing up in a neighborhood with no safe parks or affordable sports facilities cannot simply “choose” to exercise easily. A family with limited income may struggle to prioritize fresh vegetables over cheaper processed foods. These are not failures of willpower; they are structural barriers, obstacles built into the environment that restrict genuine choice.

Moreover, advertising and social media exert enormous pressure on young people. Brands invest billions in campaigns designed to shape preferences and habits, often targeting teenagers who are at a particularly impressionable stage of development.

The Role of Government and Shared Responsibility

A third perspective argues that responsibility is not an either-or choice; it does not belong entirely to the individual or entirely to society, but is shared. Governments, schools, families, and communities all have a role in creating the conditions that make healthy living possible and accessible.

In recent decades, many governments have introduced public health policies intended to guide and encourage better choices: taxes on high-sugar drinks, restrictions on junk food advertising near schools, and national campaigns promoting physical activity. Proponents argue that these measures do not remove individual freedom – they reshape the environment so that the healthier choice becomes the easier choice.

Economist Richard Thaler's concept of the “nudge” captures this idea precisely: small, well-designed changes to the context in which decisions are made can shift behavior without

restricting freedom. From this viewpoint, responsibility is not abandoned by the individual — it is supported and shared by the structures around them.

I Answer these questions :

EXPLAIN

According to the text, what does having an “internal locus of control” mean? Why do some psychologists consider it important for well-being? Explain your answer.

ANALYZE

What evidence does the text provide to support the argument for personal responsibility? How convincing do you find this evidence?

EXPLAIN

Explain what the text means by “structural barriers”. Give TWO examples from the text.

ANALYZE

How does advertising complicate the idea of personal responsibility, according to the article?

EVALUATE

Do you think Richard Thaler's idea of the “nudge” is an effective way to encourage responsible behavior? Why or why not? Use ideas from the text to support your answer.

2 State whether each statement is True (T), False (F), or Not Given (NG). Justify your answer.

1. Individuals with high self-efficacy are more likely to maintain healthy behaviors over time.

T / F / NG	
Justification	

2. The article argues that personal responsibility is the only factor that matters for health outcomes.

T / F / NG	
Justification	

3. Structural barriers make it genuinely difficult for some people to make healthy choices.

T / F / NG	
Justification	

4. Governments have no role to play in helping individuals make better lifestyle choices.

T / F / NG	
Justification	

5. The concept of “nudge” involves restricting people's freedom to choose.

T / F / NG	
Justification
