Exploring Modern Lifestyles

LESSON TWO

BACCALAUREATE

A small illustration of a gramophone with a red base and a blue horn, and a film strip with a reel of film.

READING TEXT

Modern life moves faster than ever. Technology saves us time, yet we fill that time with more tasks, screens, and pressure. How we choose to live – our daily habits, our diet, and our sleep – shapes not only our physical health, but also our identity and sense of self.

Words to know

Explore v	يستكشف	Lifestyle n	نمط حياة
move faster than ever	يسير أسرع من أي وقت مضى	save time	يوفر الوقت
fill v	يملاً	task n	مهمة
screen n	شاشة	pressure n	ضغط
daily habits	العادات اليومية	diet n	نظام غذائي / حمية
shape v	يشكل / يؤثر في	physical health	الصحة الجسدية
identity n	هوية	sense of self	الإحساس بالذات

Habits for a Healthy Lifestyle

READING TEXT

1. Exercise and Physical Activity

Health experts regularly recommend that teenagers do at least 60 minutes of moderate-to-hard physical activity every day. This doesn't necessarily mean competitive sport. Activities such as cycling to school, swimming, or even a brisk walk, all count towards the daily target. What makes exercise particularly powerful is its effect on the brain: physical activity causes the release of endorphins, chemicals that reduce feelings of stress and anxiety at the same time as boosting mood and self-confidence.

Furthermore, teenagers who exercise regularly tend to sleep more deeply and report higher levels of concentration during school hours. Despite these well-documented benefits, a landmark WHO-led study found that more than 80% of teenagers worldwide fail to meet the recommended daily activity levels, largely due to sedentary screen-based habits.

Words to know

health expert	خبير صحة	regularly adv	بانتظام
recommend v	يوصي / ينصح	at least	على الأقل
moderate-to-hard adj	معتدل إلى شديد	physical activity	النشاط البدني
necessarily adv	بالضرورة	competitive adj	تنافسي
brisk adj	سريع ونشط	count towards	يُحسب ضمن
daily target	الهدف اليومي	particularly adv	بشكل خاص
effect on	تأثير في / على	release n	إفراز
endorphins n	الإندورفين (هرمونات السعادة)	reduce v	يقلل

anxiety	n	قلق
mood	n	المزاج
furthermore	adv	علاوة على ذلك
concentration	n	تركيز
well-documented	adj	موثق جيدًا
worldwide	adv	في جميع أنحاء العالم
recommended	adj	موصى به
due to	prep	بسبب
screen-based	adj	قائم على الشاشة

boost	v	يعزز / يرفع
self-confidence	n	الثقة بالنفس
tend to		يميل إلى
despite	prep	على الرغم من
landmark	adj	بارز / فارق
fail to		يفشل في / يفشل في
largely	adv	إلى حد كبير
sedentary	adj	خامل / قليل الحركة

2. Nutrition, Sleep, and Recovery

A balanced diet is widely seen as the foundation of physical and mental well-being. Nutritionists advise that teenagers consume a varied range of fruits, vegetables, whole grains, lean proteins, and healthy fats, while limiting their intake of processed foods, too much sugar, and high-caffeine drinks. Poor nutrition has been directly linked to fatigue, difficulty concentrating, and mood changes, all of which affect academic performance. Sleep is equally important, but it is often underestimated. Teenagers require from eight to ten hours of sleep per night to support brain development, emotional control, and physical recovery. Research published in the journal Sleep Medicine found that teenagers who slept fewer than seven hours per night were more likely to report symptoms of anxiety and depression. Setting up a regular bedtime routine, such as avoiding screens for one hour before sleeping, has been shown to improve sleep quality.

Words to know

nutrition	n	تغذية
balanced diet		نظام غذائي متوازن
be seen as		يُنظر إليه على أنه
well-being	n	العافية / الرفاهية (الجسدية والنفسية)
consume	v	يستهلك / يتناول
whole grains		حبوب كاملة
healthy fats		دهون صحية
intake	n	ما يتناوله المرء من طعام وشراب / الكمية المتناولة
high-caffeine	adj	عالي الكافيين
directly linked to		مرتبط ارتباطًا مباشرًا بـ
difficulty concentrating		صعوبة في التركيز
affect	v	يؤثر في / على
equally	adv	بنفس القدر
require	v	يحتاج إلى
emotional control		التحكم في الانفعالات
journal	n	مجلة علمية

recovery	n	تعافي / استعادة العافية
widely	adv	على نطاق واسع
foundation	n	أساس / قاعدة
nutritionist	n	أخصائي تغذية
varied	adj	متنوع
lean	adj	خالٍ من الدهون
limit	v	يحد من
processed	adj	مصنّع
poor nutrition		سوء التغذية
fatigue	n	إرهاق / تعب شديد
mood changes		تقلبات المزاج
academic performance		الأداء الدراسي / الأكاديمي
underestimated	adj	لا يُقدّر حق قدره / مُستهان به
brain development		نمو الدماغ
physical recovery		التعافي الجسدي
symptom	n	عَرَض

depression n	اكتئاب	set up	يضع / ينشئ
bedtime routine	روتين ما قبل النوم	improve v	يحسن
sleep quality	جودة النوم

3. Mindfulness, Social Connection, and Mindful Consumption

In recent years, mindfulness has moved from specialist wellness programs into common education. Mindfulness involves paying deliberate attention to the present moment, and can take many forms: meditation, slow breathing exercises, yoga, or simply sitting quietly without a device. Studies suggest that even ten minutes of daily mindfulness practice leads to measurable reductions in stress hormones over a period of four to six weeks. Alongside mindfulness, social connection plays a very important role in emotional health. Spending quality time with friends and family — face to face rather than through screens — has been shown to reduce loneliness and build the emotional resilience needed to cope with life's pressures. Finally, many psychologists advise us to be conscious not only of what we eat, but also of the media, products, and information we absorb daily.

Words to know

mindfulness n	اليقظة الذهنية	social connection	الترايط الاجتماعي / الصلة الاجتماعية
mindful consumption	الاستهلاك الواعي	specialist adj	متخصص
wellness n	العافية / الصحة الشاملة	common adj	عام / شائع
involve v	يتضمن	deliberate adj	متعمد / مقصود
present moment	اللحظة الحالية	take many forms	يتخذ أشكالاً عديدة
meditation n	تأمل	breathing exercises	تمارين التنفس
yoga n	يوغا	device n	جهاز
suggest v	يشير إلى / يقترح	practice n	ممارسة
lead to	يؤدي إلى	measurable adj	قابل للقياس / ملموس
reduction n	انخفاض	stress hormones	هرمونات التوتر
over a period of	على مدى فترة	alongside prep	إلى جانب
emotional health	الصحة العاطفية	quality time	وقت ممتع (مع العائلة)
face to face	وجهًا لوجه	rather than	بدلاً من
loneliness n	الوحدة	emotional resilience	المرونة العاطفية / الصلابة النفسية
cope with	يتعامل مع / يتغلب على	conscious adj	واع / مدرك
absorb v	يستوعب / يمتص		

Vocabulary Study · Definitions

measurable adj قابل للقياس / ملموس	noticeable or able to be tracked, counted, or seen.
mindfulness n اليقظة الذهنية	paying careful attention to the present moment.
nutritionist n أخصائي تغذية	a health expert who gives advice on what to eat to stay healthy.
processed food n طعام مصنّع	any food that has been changed from its natural state, often by adding sugar, salt or chemicals to make it last longer.
sedentary adj خامل / قليل الحركة	involving little physical movement.
underestimated adj لا يُقدَّر حق قدره	not valued enough.
well-being n العافية / الرفاهية (الجسدية والنفسية)	a state of being comfortable, healthy, and happy.

Key Vocabulary

measurable adj	قابل للقياس / ملموس	mindfulness n	اليقظة الذهنية
nutritionist n	أخصائي تغذية	processed adj	مصنّع
processed food n	طعام مُصنَّع	sedentary adj	خامل / قليل الحركة
underestimated adj	لا يُقدَّر حق قدره / مُستهان به	well-being n	العافية / الرفاهية (الجسدية والنفسية)

Important Vocabulary

absorb v	يستوعب / يمتص	academic performance n	الأداء الدراسي / الأكاديمي
anxiety n	قلق	balanced diet n	نظام غذائي متوازن
boost v	يعزز / يرفع	brain development n	نمو الدماغ
caffeine n	كافيين	chemical n	مادة كيميائية
competitive adj	تنافسي	concentration n	تركيز
conscious adj	واعٍ / مدرك	consume v	يستهلك / يتناول
consumption n	استهلاك	cope with v	يتعامل مع / يتغلب على
deliberate adj	متعمد / مقصود	depression n	اكتئاب

Lesson 2
Exploring Modern Lifestyles

1 Choose the correct answer from a, b, c or d:

- 1** When you spend most of the day sitting and rarely exercise, your lifestyle is
A sedentary **B** mindful **C** measurable **D** non-judgmental
- 2** Before the exam, Lyan spent five quiet minutes focusing on her breathing; she was practising
A well-being **B** fatigue **C** mindfulness **D** anxiety
- 3** The football team employed a to check whether the players' meals were OK.
A nutritionist **B** survey **C** mindfulness **D** lifestyle
- 4** The effect of poor sleep on mood is often by teenagers.
A screen-based **B** underestimated **C** measurable **D** sedentary
- 5** Exercise, healthy meals, and enough sleep lead to
A well-being **B** stress **C** loneliness **D** fatigue
- 6** When a meal comes in a sealed packet and has been prepared in a factory, we say it is
A processed food **B** whole grain **C** lean protein **D** junk food
- 7** A/An advises people about healthy food choices and balanced diets.
A mechanic **B** architect **C** nutritionist **D** journalist
- 8** The coach tracked players' daily step counts, so their progress was
A measurable **B** screen-based **C** sedentary **D** underestimated
- 9** Trust and respect are the of a supportive classroom.
A foundation **B** intake **C** chemical **D** perception
- 10** After exercise, the body can release a/an, often called a "feel-good" chemical.
A target **B** survey **C** endorphin **D** recovery
- 11** Before presenting her project, Lyan's fear and racing thoughts were caused by
A lifestyle **B** anxiety **C** concentration **D** happiness
- 12** Doctors advise us not to too much caffeine before bed.
A consume **B** absorb **C** release **D** maintain
- 13** A short walk between study sessions can your energy.
A destroy **B** consume **C** boost **D** absorb
- 14** The ability to manage anger and other feelings before they lead to harmful behavior is called
A emotional control **B** self-confidence
C concentration **D** academic performance

- 15** Hassan switched off his phone because he needed strong to finish the difficult task.
- A** distraction **B** emotional resilience
C concept **D** concentration
- 16** The report compared exam marks before and after the programme to measure students'
- A** academic performance **B** mental health
C concentration **D** emotional resilience
- 17** Before buying snacks, a/an consumer checks the ingredients and sugar content.
- A** conscious **B** non-judgmental **C** emotional **D** sedentary
- 18** During childhood, nutritious food and enough sleep support healthy
- A** emotional control **B** brain development
C recovery **D** academic performance
- 19** A clinical condition that causes a persistent feeling of sadness and loss of interest is called
- A** anxiety **B** depression **C** fatigue **D** stress
- 20** After failing the quiz, Hassan talked to his teacher to his disappointment.
- A** ignore **B** maintain **C** cope with **D** boost
- 21** Taking time to think before choosing a career path is a decision, not a rushed one.
- A** chemical **B** deliberate **C** sedentary **D** ignorant
- 22** "Teenagers should avoid processed food." The phrase "processed food" has a similar meaning to food.
- A** fresh **B** packaged **C** whole **D** natural
- 23** "Sleep is often underestimated." The adjective "underestimated" is closest in meaning to
- A** undervalued **B** measured **C** praised **D** overrated
- 24** "The article discusses well-being." The underlined noun "well-being" is closest in meaning to
- A** anxiety **B** pressure **C** wellness **D** illness
- 25** "The results were measurable." The antonym of "measurable" is
- A** counted **B** trackable **C** uncountable **D** observable
- 26** "Processed food may contain too much sugar." The antonym of "processed" is
- A** refined **B** fresh **C** altered **D** packaged
- 27** "Many teenagers have sedentary habits." The antonym of "sedentary" is
- A** sitting-based **B** still **C** inactive **D** active
- 28** Too much screen time before bed can lead poor sleep quality.
- A** in **B** to **C** from **D** with

- 29** To improve his health, Hassan decided to his intake of processed foods.
- A** limit **B** boost **C** support **D** fill
- 30** Lyan coped the long study session by taking short breaks.
- A** from **B** to **C** with **D** of
- 31** Before going to bed, Hassan likes to set a regular routine to sleep well.
- A** up **B** from **C** to **D** with
- 32** Learning how to cope with difficult challenges helps students build emotional
- A** level **B** resilience **C** intake **D** target
- 33** Physical activity can trigger the release of which boost mood.
- A** endorphins **B** levels **C** screens **D** habits
- 34** After working long hours without a break, Hassan realized that taking care of his general well-being was essential for his health. Based on the sentence above, what does "well-being" mean?
- A** A state of being healthy, comfortable, and happy **B** The ability to succeed in difficult tasks
- C** The habit of following a strict daily routine **D** A feeling of excitement caused by achievement
- 35** Hassan spent the entire weekend playing video games on the couch without moving much. His lifestyle has become very sedentary. What does "sedentary" mean in this context?
- A** Involving regular participation in energetic outdoor activities **B** Involving frequent changes from one activity to another
- C** Involving very little physical movement **D** Involving strict control over daily eating habits
- 36** Many people think that drinking enough water is not very important, but its impact on health is often underestimated. What does "underestimated" mean in this context?
- A** Completely ignored or never noticed **B** Valued less than it deserves
- C** Carefully examined before being judged **D** Considered more important than it really is
- 37** Lyan practices mindfulness by silently sitting in a quiet room and paying attention to her feelings without judgment. Which definition describes the meaning of "mindfulness"?
- A** Paying careful attention to the present moment **B** ignoring future events
- C** Remembering past experiences in detail **D** Concentrating on several activities at once
- 38** Hassan tracked his weekly running speed to make sure his progress was measurable. Based on the sentence above, what does "measurable" mean?
- A** Impossible to judge with evidence **B** Likely to change without warning
- C** Able to be tracked or counted **D** Difficult to notice or compare
- 39** To feel more energetic, standard chips and canned soups were replaced with fresh whole foods instead of processed food. Which meaning best matches "processed food" as used here?
- A** Food chosen mainly for its nutritional value **B** Food changed from its natural state before being sold
- C** natural food **D** Food grown without using any machines

- 40** Because Hassan suffered from stomach pain and fatigue, a nutritionist reviewed his weekly meal plan and recommended healthier options. Based on the sentence above, what does "nutritionist" mean?
- A** A health specialist who advises people about suitable food and eating habits
 - B** A mental-health specialist who helps people deal with emotional difficulties
 - C** A fitness specialist who plans exercise routines to improve physical strength
 - D** A health specialist who treats injuries to muscles, bones, and joints
- 41** During the break, Hassan spent hours sitting on the sofa, ordered all his meals online, and avoided any physical movement. His daily life had become sedentary. Which situation best illustrates a similarly "sedentary" lifestyle?
- A** A student rests for a few hours after a long running session with his friends.
 - B** A worker sits at a computer desk all day, uses the elevator for one floor, and rarely walks.
 - C** A player spends his weekends swimming and playing football with his team.
 - D** Lyan reads for two hours every afternoon and goes for a long walk in the evening.
- 42** Lyan compared simple fresh milk with a boxed flavored drink containing artificial additives and extra sugar. She chose the fresh milk to consume less processed food. Which situation best illustrates "processed food"?
- A** A family prepares fresh orange juice at home for breakfast.
 - B** A girl washes fresh apples and slices them for her lunchbox.
 - C** A man eats a bowl of boiled eggs with fresh cucumber.
 - D** A boy eats packaged instant noodles made in a factory with added flavors and preservatives.
- 43** Hassan thought learning to ride a bicycle would take only ten minutes, but it took him two weeks of practice. He realized the task had been underestimated. Which situation best reflects the meaning of "underestimated"?
- A** Football fans expect their team to win every match easily.
 - B** A boy thinks a long math test is very easy, but he finds it much harder than he expected.
 - C** A family checks the weather forecast before going on a road trip.
 - D** Lyan plans her weekly schedule carefully before starting her homework.
- 44** Hassan kept track of his weekly running speeds and recorded the numbers in his notebook. His overall progress was measurable. Which situation best illustrates the meaning of the word "measurable"?
- A** A runner feels stronger after training, but never writes down his times or distances.
 - B** A company compares this month's exact production numbers with last month's data.
 - C** A fan believes his team played better because the match was exciting to watch.
 - D** A student hopes her marks will improve in the upcoming semester.

45 After feeling constantly tired and confused about his meal plans, Hassan consulted a nutritionist to guide him toward healthier habits. Which situation best demonstrates the role of a "nutritionist"?

- A** A trainer shows a runner proper breathing techniques for a marathon.
- B** A counselor helps a student deal with exam-related stress and anxiety.
- C** A specialist creates a customized daily dietary plan to help an athlete meet his nutritional goals.
- D** A doctor treats a player's broken leg after a match.

2 Read the following text, then find the word or phrase in the text that could meaningfully replace the words below.

Proper daily habits strongly enhance overall wellness. Many students become inactive because they spend long hours studying at desks without moving. To stay healthy, a diet expert usually recommends eating fresh meals instead of packaged food. The importance of getting enough sleep should never be undervalued, as it restores energy. Furthermore, practicing awareness through quiet meditation helps students lower their anxiety, leading to trackable improvements in their focus.

1 well-being

2 sedentary

3 nutritionist

4 processed food

5 underestimated

6 mindfulness

7 measurable

3 Complete the sentences using the correct form of the word in brackets.

- 1** Lyan takes a few minutes every morning for (mindful) to stay calm and focused.
- 2** Eating too many (process) foods can negatively affect your health over time.
- 3** Hassan's daily steps grew significantly, showing a (measure) improvement in his health.
- 4** Many students fail their tests because they have a/an (underestimated) of how much study time they need.
- 5** Working at a desk all day often leads to a (sedentariness) pattern of living.
- 6** Eating fresh vegetables daily is essential for good (nutritionist).

READING TEXT

1. Exercise and Physical Activity

Health experts regularly recommend that teenagers do at least 60 minutes of moderate-to-hard physical activity every day. This doesn't necessarily mean competitive sport. Activities such as cycling to school, swimming, or even a brisk walk, all count towards the daily target. What makes exercise particularly powerful is its effect on the brain: physical activity causes the release of endorphins, chemicals that reduce feelings of stress and anxiety at the same time as boosting mood and self-confidence.

Furthermore, teenagers who exercise regularly tend to sleep more deeply and report higher levels of concentration during school hours. Despite these well-documented benefits, a landmark WHO-led study found that more than 80% of teenagers worldwide fail to meet the recommended daily activity levels, largely due to sedentary screen-based habits.

2. Nutrition, Sleep, and Recovery

A balanced diet is widely seen as the foundation of physical and mental well-being. Nutritionists advise that teenagers consume a varied range of fruits, vegetables, whole grains, lean proteins, and healthy fats, while limiting their intake of processed foods, too much sugar, and high-caffeine drinks. Poor nutrition has been directly linked to fatigue, difficulty concentrating, and mood changes, all of which affect academic performance. Sleep is equally important, but it is often underestimated. Teenagers require from eight to ten hours of sleep per night to support brain development, emotional control, and physical recovery. Research published in the journal *Sleep Medicine* found that teenagers who slept fewer than seven hours per night were more likely to report symptoms of anxiety and depression. Setting up a regular bedtime routine, such as avoiding screens for one hour before sleeping, has been shown to improve sleep quality.

3. Mindfulness, Social Connection, and Mindful Consumption

In recent years, mindfulness has moved from specialist wellness programs into common education. Mindfulness involves paying deliberate attention to the present moment, and can take many forms: meditation, slow breathing exercises, yoga, or simply sitting quietly without a device. Studies suggest that even ten minutes of daily mindfulness practice leads to measurable reductions in stress hormones over a period of four to six weeks. Alongside mindfulness, social connection plays a very important role in emotional health. Spending quality time with friends and family — face to face rather than through screens — has been shown to reduce loneliness and build the emotional resilience needed to cope with life's pressures. Finally, many psychologists advise us to be conscious not only of what we eat, but also of the media, products, and information we absorb daily.

1 Answer these questions :**EXPLAIN**

According to the text, what is the recommended daily activity level for teenagers? Give ONE example of how this can be achieved.

EXPLAIN

In your own words, explain what "mindful consumption" means. Why do psychologists consider it an essential life skill?

ANALYZE

How does exercise affect the brain? Use evidence from the text to support your answer.

ANALYZE

What did the WHO-led study reveal about teenagers worldwide?
Why does the text describe this finding as surprising?

EVALUATE

Do you think "mindful consumption" is one of the most important life skills for teenagers today? Why or why not? Use ideas from the text to support your answer.

2 Read the information, then decide whether the statement is True (T) or False (F). Justify your answer.

1. Teenagers who exercise regularly tend to concentrate better at school.

True	
False	
Justification	

2. According to the WHO , most teenagers worldwide meet the recommended daily activity levels.

True	
False	
Justification	

3. Sleep has little connection to emotional wellbeing in teenagers.

True	
False	
Justification	

محمود

SKILLS

Analytical Paragraph الفقرة الإنشائية التحليلية

Definition :

An analytical paragraph presents a clear claim, explains the reason behind it, supports it with evidence, and shows how the evidence proves the claim.

تعرض الفقرة الإنشائية التحليلية رأيًا واضحًا، وتشرح سببه، وتدعمه بدليل، ثم توضح كيف يبرهن الدليل على الرأي.

Example

Physical activity is more influential than diet in improving overall well-being. This is because exercise directly affects both physical health and mental well-being. According to the text, physical activity releases endorphins which reduce stress and improve mood. This shows that exercise not only improves physical health but also has a strong impact on mental well-being. Therefore, physical activity plays a more significant role than diet in shaping overall well-being.

Main Parts of an Analytical Paragraph

1- Topic Sentence / Claim الجملة الرئيسية / الادعاء

Start with a clear opinion that answers the question.

- It can be argued that ...
- In my view, ...
- The most important factor is ...
- ... plays a major role in ...

2- Reason السبب

Explain why you believe your claim is well supported.

اشرح لماذا تعتقد أن رأيك مدعوم جيدًا بالأدلة.

- This is because ...
- The reason is that ...
- This can be explained by ...
- One reason for this is ...

SKILLS

3- Evidence الدليل / الإثبات

Support your idea using information from the text, examples, or facts.

ادعم فكرتك بمعلومات من النص أو أمثلة أو حقائق.

- According to the text, ...
- The article states that ...
- The text shows that ...
- For example, ...

4- Explanation الشرح / التفسير

Explain how your evidence supports your claim.

اشرح كيف يدعم دليلك رأيك.

- This shows that ...
- This proves that ...
- This means that ...
- As a result, ...

5- Concluding Sentence الجملة الختامية

Restate / Strengthen your main idea.

تعيد صياغة وتقوية فكرتك الرئيسية.

- Therefore, ...
- For this reason, ...
- Overall, ...
- This clearly shows that ...

07 WRITING SKILLS
